License Models

You decide how you use KISSsoft –
We offer a suitable license model

Total Costs

- The different license models result in different annual and total costs

- Flexibility models require lower initial invest-ment, offer greater flexibility and lead to higher long-term costs

- Standard models start with a higher initial investment for the purchase and have lower annual costs

Total costs / Years

Perpetual
Installments
Short-term rental
Subscription

For Consideration Before Choosing a License Model

- Check your engineer's requirements:
  Will the needs remain the same or will they change over time?

- Set a time horizon:
  Do you need the license for one project, one development cycle or long-term?

- Consider your financial situation:
  Invest more now and less later or better the other way around?

- Contact other stakeholders:
  Are the licenses used at one site or several sites? How many users are there at the moment and how many will be there in future?

Our Promise

We provide you with transparent, comprehensive and objective advice. You are free to choose the license model you consider suitable.
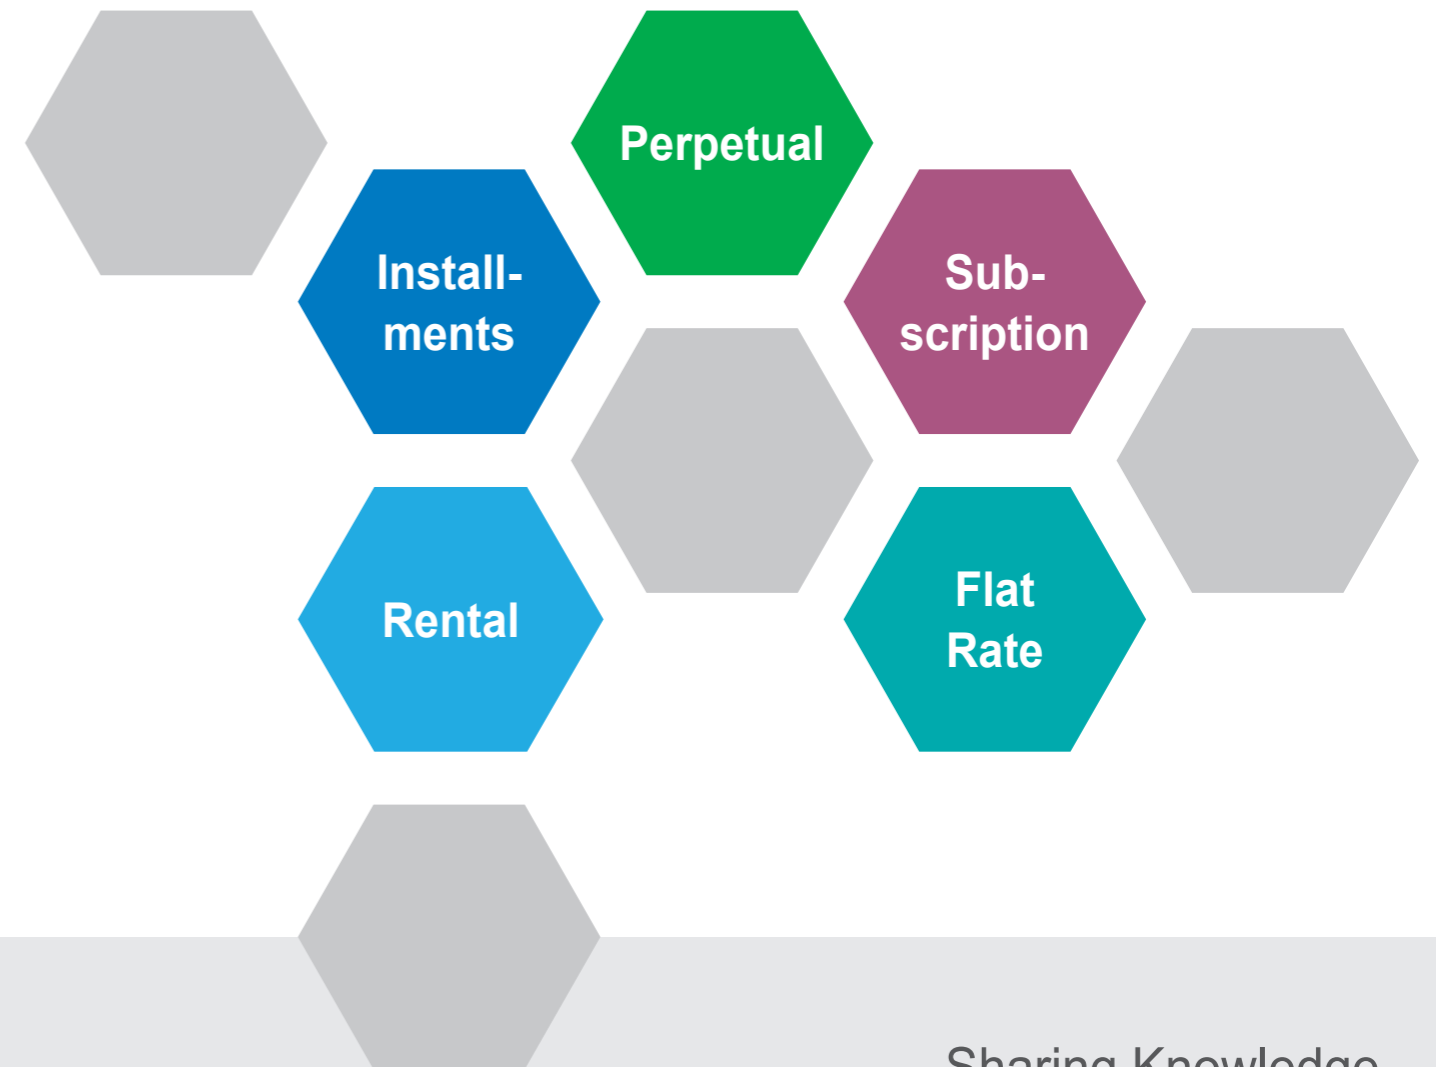

Your Needs

Tell us your specific requirements. We will suggest matching license models based on our experience.
